

Philips Hue CLIP API v2 Documentation

Philips Hue CLIP API v2 Documentation

Base URL:

`https://{bridge}/clip/v2`

Bridge:

The IP address or hostname of the Hue Bridge.

Overview:

The CLIP API v2 exposes resources under `/resource`. Each resource supports one or more HTTP methods (GET, POST, PUT, DELETE).

Core Resources:

- `/resource` : Retrieve all API resources.
- `/resource/light` : Manage light services.
- `/resource/scene` : Manage scenes.
- `/resource/room` : Manage rooms.
- `/resource/zone` : Manage zones.
- `/resource/bridge_home` : Manage bridge homes.
- `/resource/grouped_light` : Grouped light services.
- `/resource/device` : Manage devices.
- `/resource/bridge` : Bridge management.
- `/resource/device_software_update` : Device software updates.
- `/resource/device_power` : Battery status.
- `/resource/zigbee_connectivity` : Zigbee connectivity.
- `/resource/zgp_connectivity` : Zigbee Green Power connectivity.
- `/resource/zigbee_device_discovery` : Zigbee commissioning.
- `/resource/motion` : Motion sensors.
- `/resource/service_group` : Aggregate services.
- `/resource/grouped_motion` : Grouped motion.
- `/resource/grouped_light_level` : Grouped light level.
- `/resource/camera_motion` : Camera motion.
- `/resource/temperature` : Temperature sensors.
- `/resource/light_level` : Ambient light sensors.
- `/resource/button` : Button services.
- `/resource/bell_button` : Bell button services.
- `/resource/relative_rotary` : Rotary controls.
- `/resource/switch_input_configuration` : Switch configuration.
- `/resource/behavior_script` : Discover scripts.
- `/resource/behavior_instance` : Script instances.
- `/resource/geofence_client` : Geofencing.
- `/resource/geolocation` : Geolocation.
- `/resource/entertainment_configuration` : Entertainment configuration.
- `/resource/entertainment` : Entertainment services.
- `/resource/homekit` : HomeKit.
- `/resource/matter` : Matter.
- `/resource/matter_fabric` : Matter fabrics.
- `/resource/smart_scene` : Smart scenes.
- `/resource/contact` : Contact sensors.
- `/resource/tamper` : Tamper sensors.
- `/resource/motion_area_configuration` : Motion areas.
- `/resource/motion_area_candidate` : Motion area candidates.
- `/resource/convenience_area_motion` : Convenience motion.
- `/resource/security_area_motion` : Security motion.
- `/resource/speaker` : Speaker services.
- `/resource/clip` : Public CLIP services.

- /resource/wifi_connectivity : Wi-Fi connectivity.

Each resource typically supports GET and may additionally support POST, PUT and DELETE depending on the resource, as listed in the supplied source.
